Pioneer Union Elementary School District's Wellness Policies on Physical Activity and Nutrition

Preamble

Whereas, children need access to healthful foods and opportunities to be physically active in order to grow, learn, and thrive;

Whereas, good health fosters student attendance and education;

Whereas, obesity rates have doubled in children and tripled in adolescents over the last two decades, and physical inactivity and excessive calorie intake are the predominant causes of obesity;

Whereas, heart disease, cancer, stroke, and diabetes are responsible for two-thirds of deaths in the United States, and major risk factors for those diseases, including unhealthy eating habits, physical inactivity, and obesity, often are established in childhood;

Whereas, only 2% of children (2 to 19 years) eat a healthy diet consistent with the five main recommendations from the Food Guide Pyramid;

Whereas, nationally, the items most commonly sold from school vending machines, school stores, and snack bars include low-nutrition foods and beverages, such as soda, sports drinks, imitation fruit juices, chips, candy, cookies, and snack cakes;

Whereas, school districts around the country are facing significant fiscal and scheduling constraints; and

Whereas, community participation is essential to the development and implementation of
successful school wellness policies;

Thus, the Pioneer Union Elementary School District is committed to providing a school environment that promote and protect children's health, well-being, and ability to learn by supporting healthy eating and physical activity. Therefore, it is the policy of the Feather Falls Union Elementary School District that:

- The school district will engage students, parents, teachers, food service professionals, health professionals, and other interested community members in developing, implementing, monitoring, and reviewing district-wide nutrition and physical activity policies.
- All students in grades K-8 will have opportunities, support, and encouragement to be physically active on a regular basis.
- Foods and beverages sold or served at school will meet the nutrition recommendations of the *U.S. Dietary Guidelines for Americans*.
- Qualified child nutrition professionals will provide students with access to a variety of affordable, nutritious, and appealing foods that meet the health and nutrition needs of students; will accommodate the religious, ethnic, and cultural diversity of the student body in meal planning; and will provide clean, safe, and pleasant settings and adequate time for students to eat.
- To the maximum extent practicable, our district will participate in available federal school meal programs (including the School Breakfast Program, National School Lunch Program).
- School will provide nutrition education and physical education to foster lifelong habits of healthy eating and physical activity, and will establish linkages between health education and school meal programs, and with related community services.

**TO ACHIEVE THESE POLICY GOALS:**

**I. School Health Council/Committee**

The Boards’ policy related to student wellness shall be developed with the involvement of parents/guardians, students, school food service professionals, school administrators, Board representatives, and members of the public.

The Superintendent or designee may appoint a school health council or other committee consisting of representatives of the above groups. The council or committee may also include, health professionals, school nurses, health educators, physical education teachers, counselors, and/or others interested in school health issues.

**II. Nutritional Quality of Foods and Beverages Sold and Served on Campus**

**School Meals**

Meals served through the National School Lunch and Breakfast Programs will:

- be appealing and attractive to children;
- be served in clean and pleasant settings;
• meet, at a minimum, nutrition requirements established by local, state, and federal statutes and regulations;
• offer a variety of fruits and vegetables;
• serve only low-fat (1%) and fat-free milk and nutritionally-equivalent non-dairy alternatives (to be defined by USDA); and
• ensure that half of the served grains are whole grain.

**Breakfast.** To ensure that all children have breakfast, either at home or at school, in order to meet their nutritional needs and enhance their ability to learn:

• Schools will, to the extent possible, operate the School Breakfast Program.
• Schools will, to the extent possible, arrange bus schedules and utilize methods to serve school breakfasts that encourage participation
• Schools that serve breakfast to students will notify parents and students of the availability of the School Breakfast Program.
• Schools will encourage parents to provide a healthy breakfast for their children through newsletter articles, take-home materials, or other means.

**Free and Reduced-priced Meals.** Schools will make every effort to eliminate any social stigma attached to, and prevent the overt identification of, students who are eligible for free and reduced-price school meals. Toward this end, schools may utilize electronic identification and payment systems; provide meals at no charge to all children, regardless of income; promote the availability of school meals to all students; and/or use nontraditional methods for serving school meals.

**Meal Times and Scheduling.** Schools:

• will provide students with at least 10 minutes to eat after sitting down for breakfast and 20 minutes after sitting down for lunch;
• should schedule meal periods at appropriate times, e.g., lunch should be scheduled between 11 a.m. and 1 p.m.;
• should not schedule tutoring, club, or organizational meetings or activities during mealtimes, unless students may eat during such activities;
• will provide students access to hand washing or hand sanitizing before they eat meals or snacks; and

**Qualifications of School Food Service Staff.** Qualified nutrition professionals will administer the school meal programs. As part of the school district's responsibility to operate a food service program, we will provide continuing professional development for all nutrition professionals in schools. Staff development programs should include appropriate certification and/or training programs for child nutrition directors, school nutrition managers, and cafeteria workers, according to their levels of responsibility.

**Sharing of Foods and Beverages.** The schools will discourage students from sharing their foods or beverages with one another during meal or snack times, given concerns about allergies and other restrictions on some children's diets.

**Foods and Beverages Sold Individually (i.e., foods sold outside of reimbursable school meals, such as through vending machines, cafeteria a la carte [snack] lines, fundraisers, school stores, etc.)**

**Elementary School.** The school food service program will approve and provide all food and
beverage sales to students. Given young children's limited nutrition skills, food should be sold as balanced meals. If available, foods and beverages sold individually should be limited to low-fat and non-fat milk, fruits, and non-fried vegetables.

- **Beverages**
  
  - **Allowed:** water or seltzer water without added caloric sweeteners; fruit and vegetable juices and fruit-based drinks that contain at least 50% fruit juice and that do not contain additional caloric sweeteners; unflavored or flavored low-fat or fat-free fluid milk and nutritionally-equivalent nondairy beverages (to be defined by USDA);
  
  - **Not allowed:** soft drinks containing caloric sweeteners; iced teas; fruit-based drinks that contain less than 50% real fruit juice or that contain additional caloric sweeteners; beverages containing caffeine, excluding low-fat or fat-free chocolate milk (which contain trivial amounts of caffeine).

- **Foods**
  
  - A food item sold individually:
    
    - will have no more than 35% of its calories from fat (excluding nuts, seeds, peanut butter, and other nut butters) and 10% of its calories from saturated and trans fat combined;
    
    - will have no more than 35% of its **weight** from added sugars;
    
    - will contain no more than 230 mg of sodium per serving for chips, cereals, crackers, French fries, baked goods, and other snack items; will contain no more than 480 mg of sodium per serving for pastas, meats, and soups; and will contain no more than 600 mg of sodium for pizza, sandwiches, and main dishes.

  - A choice of at least two fruits and/or non-fried vegetables will be offered for sale at any location on the school site where foods are sold. Such items could include, but are not limited to, fresh fruits and vegetables; 100% fruit or vegetable juice; fruit-based drinks that are at least 50% fruit juice and that do not contain additional caloric sweeteners; cooked, dried, or canned fruits (canned in fruit juice or light syrup); and cooked, dried, or canned vegetables (that meet the above fat and sodium guidelines).

- **Portion Sizes**
  
  - Limit portion sizes of foods and beverages sold individually to those listed below:
    
    - One and one-quarter ounces for chips, crackers, popcorn, cereal, trail mix, nuts, seeds, dried fruit, or jerky;
    
    - One ounce for cookies;
    
    - Two ounces for cereal bars, granola bars, pastries, muffins, doughnuts, bagels, and other bakery items;
    
    - Four fluid ounces for frozen desserts, including, but not limited to, low-fat or fat-free ice cream;
    
    - Eight ounces for non-frozen yogurt;
    
    - Twelve fluid ounces for beverages, excluding water; and
    
    - The portion size of a la carte entrees and side dishes, including potatoes, will not be greater than the size of comparable portions offered as part of school meals.
Fruits and non-fried vegetables are exempt from portion-size limits.

**Fundraising Activities.** To support children's health and school nutrition-education efforts, school fundraising activities shall be encouraged to raise funds through the sale of items that promote positive health habits. Only foods that meet the 35/10/35 guidelines and portion size standards for foods and beverages sold individually will be sold.

**Rewards.** The school will not use foods or beverages, especially those that do not meet the nutrition standards for foods and beverages sold individually (above), as rewards for academic performance or good behavior more than once a week, and will not withhold food or beverages (including food served through school meals) as a punishment.

**Celebrations.** Schools should limit celebrations that involve food during the school day to no more than one party per class per month. Each party should include no more than one food or beverage that does not meet nutrition standards for foods and beverages sold individually (above). All food served in class must be commercially prepared or prepared in the school kitchen with cafeteria staff supervision. The district will disseminate a list of healthy party ideas to parents and teachers.

**School-sponsored Events (such as, but not limited to, athletic events, dances, or performances).** Foods and beverages offered or sold at school-sponsored events outside the school day will meet the nutrition standards for meals or for foods and beverages sold individually (above).

### III. Nutrition and Physical Activity Promotion and Food Marketing

**Nutrition Education and Promotion.** Pioneer Union Elementary School District aims to teach, encourage, and support healthy eating by students. The school will provide nutrition education and engage in nutrition promotion that:

- is offered at each grade level as part of a sequential, comprehensive, standards-based program designed to provide students with the knowledge and skills necessary to promote and protect their health;
- is part of not only health education classes, but also classroom instruction in subjects such as math, science, language arts, social sciences, and elective subjects;
- includes enjoyable, developmentally-appropriate, culturally-relevant, participatory activities, such as contests, promotions, taste testing, farm visits, and school gardens;
- promotes fruits, vegetables, whole grain products, low-fat and fat-free dairy products, healthy food preparation methods, and health-enhancing nutrition practices;
- emphasizes caloric balance between food intake and energy expenditure (physical activity/exercise);
- links with school meal programs, other school foods, and nutrition-related community services;
- teaches media literacy with an emphasis on food marketing; and
- includes training for teachers and other staff.

**Integrating Physical Activity into the Classroom Setting.** For students to receive the nationally-recommended amount of daily physical activity (i.e., at least 60 minutes per day) and for students to fully embrace regular physical activity as a personal behavior, students need opportunities for physical activity beyond physical education class. Toward that end:
• classroom health education will complement physical education by reinforcing the knowledge and self-management skills needed to maintain a physically-active lifestyle and to reduce time spent on sedentary activities, such as watching television;
• opportunities for physical activity will be incorporated into other subject lessons; and

Communications with Parents. The district/school will support parents' efforts to provide a healthy diet and daily physical activity for their children. The district/school will send home nutrition information, post nutrition tips on school websites, and provide nutrient analyses of school menus. Schools should encourage parents to pack healthy lunches and snacks and to refrain from including beverages and foods that do not meet the above nutrition standards for individual foods and beverages. The district/school will provide parents a list of foods that meet the district's snack standards and ideas for healthy celebrations/parties, rewards, and fundraising activities. In addition, the district/school will provide opportunities for parents to share their healthy food practices with others in the school community.

The district/school will provide information about physical education and other school-based physical activity opportunities before, during, and after the school day; and support parents' efforts to provide their children with opportunities to be physically active outside of school. Such supports will include sharing information about physical activity and physical education through a website, newsletter, or other take-home materials, special events, or physical education homework.

Staff Wellness. Pioneer Union Elementary School District highly values the health and well-being of every staff member and will plan and implement activities and policies that support personal efforts by staff to maintain a healthy lifestyle.

Marketing. School-based marketing will be consistent with nutrition education and health policies. Students receive positive messages about healthy eating and physical activity throughout the school setting. The school will prohibit the marketing and advertising of non-nutritious foods and beverages through signage, logos, school supplies, advertisements in school publications, coupon or incentive programs or other means.

IV. Physical Activity Opportunities and Physical Education

Daily Physical Education (P.E.) K-8. All students in grades K-8, including students with disabilities, special health-care needs, and in alternative educational settings, will receive daily physical education (or its equivalent of 200 minutes/10 days). Student involvement in other activities involving physical activity will not be substituted for meeting the physical education requirement. Students will spend at least 50 percent of physical education class time participating in moderate to vigorous physical activity.

Daily Recess. All elementary school students will have at least 20 minutes a day of supervised recess, preferably outdoors, during which schools should encourage moderate to vigorous physical activity verbally and through the provision of space and equipment.

Schools should discourage extended periods (i.e., periods of two or more hours) of inactivity. When activities, such as mandatory school-wide testing, make it necessary for students to remain indoors for long periods of time, schools should give students periodic breaks during which they are encouraged to stand and be moderately active.
Use of School Facilities Outside of School Hours. School spaces and facilities should be available to students, staff, and community members before, during, and after the school day, on weekends, and during school vacations. These spaces and facilities also should be available to community agencies and organizations offering physical activity and nutrition programs. School policies concerning safety will apply at all times.

V. Monitoring and Policy Review

Monitoring. The superintendent or designee will ensure compliance with established district-wide nutrition and physical activity wellness policies.

District food service staff will ensure compliance with nutrition policies within school food service areas and will report on this matter to the superintendent. In addition, the school district will report on the most recent USDA School Meals Initiative (SMI) review findings and any resulting changes. If the district has not received a SMI review from the state agency within the past five years, the district will request from the state agency that a SMI review be scheduled as soon as possible.

The superintendent will develop a summary report every three years on district-wide compliance with the district's established nutrition and physical activity wellness policies. That report will be provided to the school board and also distributed to all school health councils, parent/teacher organizations, and school health services personnel in the district.

Students will have a minimum of 100 minutes a week of physical education. The implementation plan will take steps to monitor the exercise program on a weekly basis to determine if hours are appropriate. Responsibility for monitoring will be designated by the school principal before school begins each year.

Implement a staff health promotion program by January, by the district office. Post on the district Web site and disseminate to community through letter, newsletters, brochures and other forms of communication informing them about the school wellness policies updates, with expectations regarding compliance. Report Local School Wellness Policy implementation progress to School Board annually.

Policy Review. To help with the initial development of the district's wellness policies the district will conduct a baseline assessment of the school's existing nutrition and physical activity environments and policies. The results of these assessments will used to identify and prioritize needs.

Assessments will be repeated every three years to help review policy compliance, assess progress, and determine areas in need of improvement. As part of that review, the school district will review our nutrition and physical activity policies; provision of an environment that supports healthy eating and physical activity; and nutrition and physical education policies and program elements. The district will, as necessary, revise the wellness policies and develop work plans to facilitate their implementation.

Footnotes

1It is against the law to make others in the cafeteria aware of the eligibility status of children for free, reduced-price, or "paid" meals.
2 Unless this practice is allowed by a student's individual education plan (IEP).

3 Advertising of low-nutrition foods and beverages is permitted in supplementary classroom and library materials, such as newspapers, magazines, the Internet, and similar media, when such materials are used in a class lesson or activity, or as a research tool.

In accordance with Federal civil rights law and U.S. Department of Agriculture (USDA) civil rights regulations and policies, the USDA, its Agencies, offices, and employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, sex, disability, age, or reprisal or retaliation for prior civil rights activity in any program or activity conducted or funded by USDA.

Persons with disabilities who require alternative means of communication for program information (e.g. Braille, large print, audiotape, American Sign Language, etc.), should contact the Agency (State or local) where they applied for benefits. Individuals who are deaf, hard of hearing or have speech disabilities may contact USDA through the Federal Relay Service at (800) 877-8339. Additionally, program information may be made available in languages other than English.

To file a program complaint of discrimination, complete the USDA Program Discrimination Complaint Form, (AD-3027) found online at: http://www.ascr.usda.gov/complaint_filing_cust.html, and at any USDA office, or write a letter addressed to USDA and provide in the letter all of the information requested in the form. To request a copy of the complaint form, call (866) 632-9992. Submit your completed form or letter to USDA by:
